Description Title

Here you can find the key information you need to answer the following questions. It might contain equations and mathematical symbols you need to be able to see, like $\alpha + \beta < \ln 1$, x , or y . *There might be text in italics.* **There might be bold text.** Here an equation:

$$\begin{array}{ll} \max_{x,y} & x \cdot y \\ \text{s.t.} & 2 \cdot x + y = 100. \end{array}$$

1. (0 points) The question you need to answer is here. It might contain equations and mathematical symbols you need to be able to see, like $x = b$ and $y = \mathcal{Z} \implies x \cdot y = K$. It might also contain a an unnumbered list:

- $a + b \leq z$.
- Second element.

Or a numbered list:

1. First equation: $\sum_{x=1}^n j_x$.
2. Second equation: $e^{\ln x}$.

And even some text after the list.

- A. The correct answer can be anywhere. It might contain equations and mathematical symbols you need to be able to see, like $\implies$ or $\impliedby$.
- B. A wrong answer can be anywhere. It might contain equations and mathematical symbols you need to be able to see, like $\implies$ or $\impliedby$.
- C. A wrong answer can be anywhere. It might contain equations and mathematical symbols you need to be able to see, like $\implies$ or $\impliedby$.
- D. A wrong answer can be anywhere. It might contain equations and mathematical symbols you need to be able to see, like $\implies$ or $\impliedby$.

Solution: You should never see this on Moodle.
